

INTERprint HX-280S

FULL SERVO INTERMITTENT LETTERPRESS

The New Generation multi SERVO Intermittent!!

Is your existing central impression letterpress old and tired? Finding your repair bills climbing, quality declining and waste going through the roof? Or, maybe you have decided to investigate new printing technologies and been alarmed at the entry cost.....

.....then Print-Partners have great news for you!

- ✓ Our HX-280S INTERprint Letterpress is a state-of-the-art machine that is packed with features. It can be run as either a stand-alone press, or linked and talking the same language with other servo driven platforms like screen, emboss/ diecut and hot foil.
- ✓ Precise servo control ensures minimal setup times and delivers the very best quality outcomes.
- ✓ BST Video Inspection is standard on this machine. A highly accurate re-pass facility is also included.
- ✓ Australian technical support gives you peace of mind....and the warranty offered by Print-Partners is for a period of two years.
- ✓ The press options include flexo and rotary die.
- ✓ This machine is ideally suited for short run, boutique label manufacturers looking for quick setup, consistent quality and ease of use.
